Faucet in a Box

Faucet in a Box is a complete, ready to use faucet script. It integrates with FaucetBOX.com, so there's no need to install full Bitcoin, Litecoin or any other server.

Features

- Support for reCaptcha and SolveMedia captcha
- Ready to use, pretty templates with easy customization
- Lightweight and secure
- Just 4-step installation

Download latest version

Installation

1. Download script and unpack it.
2. Open [config.php](#) file with any text editor and replace default values with your database connection parameters. You can get them from your hosting provider.
3. Upload all files to your server. Usually you can do that using FTP, SFTP or similar service.
4. Open your website.

Requirements

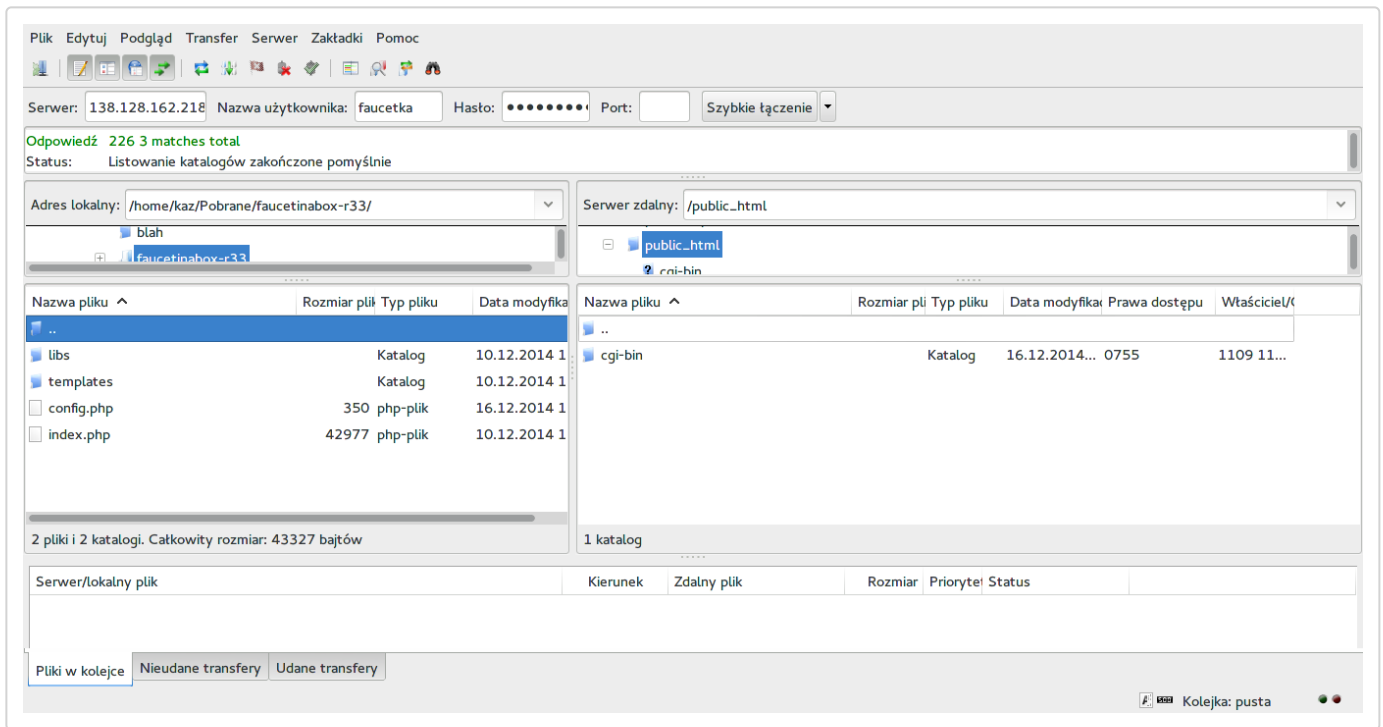

Everything should be already installed and enabled on most servers. If you have your own server, here are all requirements:

Descomprima el archivo descargado y edite config.php. \$ dbuser, \$ dbpass y \$ dbname tienen que coincidir con estos desde cPanel

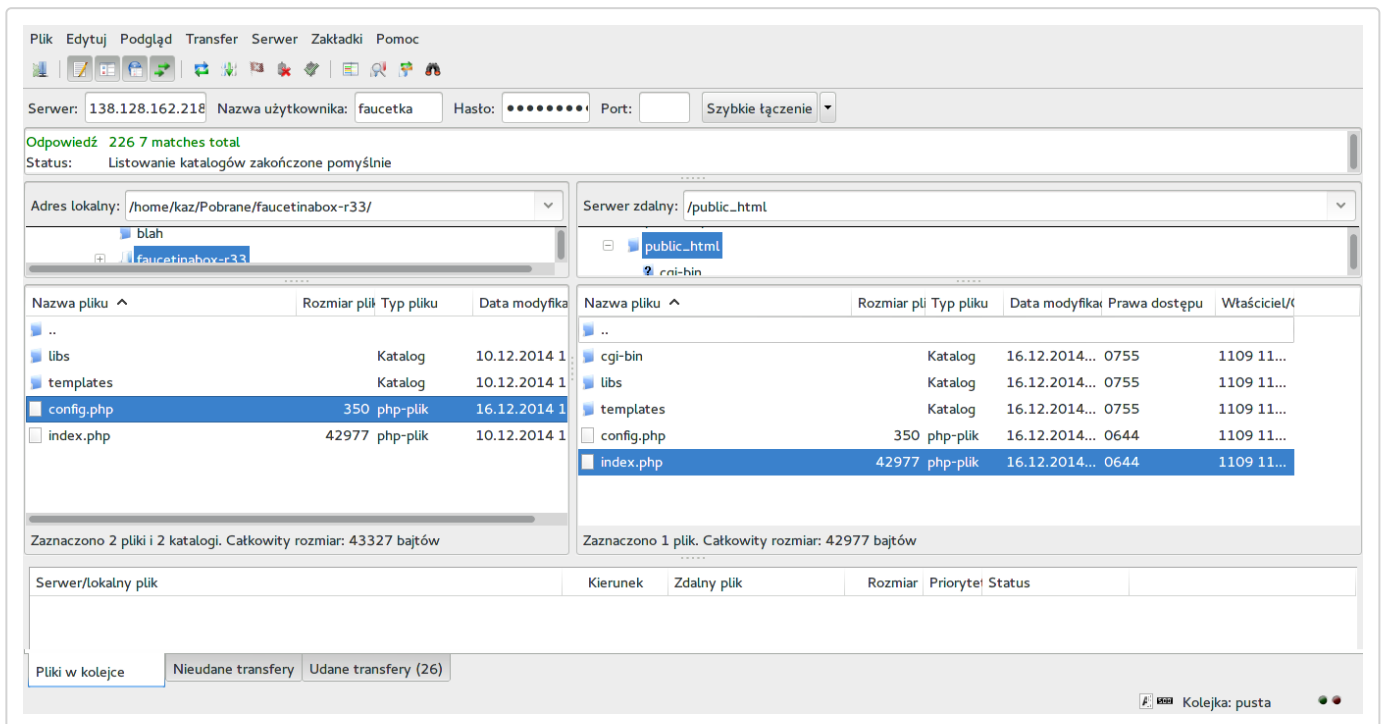

```
1 <?php
2
3 $dbhost = "localhost";
4 $dbuser = "faucetka_db";
5 $dbpass = "*****";
6 $dbname = "faucetka_db";
7 $display_errors = false;
8 $disable_curl = false;
9 $local_cafile = false;
10
11 // dsn - Data Source Name
12 // if you use MySQL, leave it as is
13 // more information:
14 // http://php.net/manual/en/pdo.construct.php
15 $dbdsn = "mysql:host=$dbhost;dbname=$dbname";
```

Cargue todos los archivos del directorio faucetinabox-rNN al directorio public_html de su servidor

He usado FileZilla para subir mis archivos. Así es como se veía antes de la carga

Y esto es despu s de la carga

Ahora abre tu Faucet. Debe obtener una contrase a generada que debe copiar de inmediato

Welcome to your Faucet in a Box Admin Page!

Your password: XXXXXXXXXX Make sure to save it. [Click here to continue](#).

Ingrese la contrase1a copiada de la pantalla anterior para iniciar sesi3n en su panel de administraci3n de Faucet

Welcome to your Faucet in a Box Admin Page!

Password:

*

Login

Don't remember? Delete password row from Faucetinabox_Settings table in your database. You can copy-paste this query:

```
DELETE FROM 'Faucetinabox_Settings' WHERE 'name' = 'password' .
```

Debería ver un panel similar a este. Si ve alg3n <:: something_here ::>, entonces algo sali3 mal.

Welcome to your Faucet in a Box Admin Page!

Required:

FaucetBOX.com API:

FaucetBOX.com API key
You can get it from [FaucetBOX.com dashboard](#) (you have to register and log in)

Currency
Select currency you want to use.

BTC

Captcha:

Select captcha service:

SolveMedia

Get your keys [here](#) (select *Sites* from the menu after logging in).

SolveMedia challenge key:

SolveMedia verification key:

SolveMedia authentication key:

Rewards:

How much users can get from you? You can set multiple rewards (separate with comma) and set weights for them, to define how plausible each reward will be.
Examples: 100, 50, 150, 300, 10*50, 2*100. The last example means 50 satoshi or DOGE 10 out of 12 times, 100 satoshi or DOGE 2 out of 12 times.
It should be in satoshi (which means 0.00000001 COIN) for everything except DOGE. For DOGE it's in whole coins.

10*100, 1*500

Options:

Faucet name

Faucet in a Box

Ingrese al menos su clave API de FaucetBOX.com y claves para al menos un captcha. Aseg3rese de no ver este error al guardar la configuraci3n.
